

### European and transnational projects

Promoted by Formedil and other European Partners, mainly of the Reforme network, they support meeting between young people and trainers by enhancing Italian construction and training abroad as well as by developing certification systems for a mutual recognition of the EQF and EQUAVET.

Since 2014 Formedil has been coordinating the European project Build Up Skills I-TOWN on the training of construction workers in the field of energy efficiency and the use of renewable energy.

### National Construction Industry Job Exchange (BLEN.it)

A system of fully free services born to meet the supply and demand of employment in the construction sector. BLEN.it is recognized by the Ministry of Labour through the Formedil accreditation into the Register of Employment Agencies-section III, for the Bilateral Bodies.

It is managed by the buiding schools present on the territory and makes use of the important contribution of the Facilitators of Social Partners.

On the basis of the contract change dated last July 2014 Construction Industry and Cooperation, the enterprises using BLEN.it services can employ 15% more workers with a time-limited employment contract. Workers and enterprises can directly register on line on the portal [www.blen.it](http://www.blen.it) or go to the building school desk.

It is also possible to contact Formedil emailing to [formedil@blen.it](mailto:formedil@blen.it).

The National Construction Industry Job Exchange is a tool of the Social Parties to promote good employment.

# FORMEDIL

National Body for Vocational training  
and education in construction

## ABOUT US

Formedil is the national joint association for training in the building sector, established in 1980 by the signatory Associations of the National Collective Agreement of work construction industry, ANCE, Feneal UIL, Filca CISL, Fillea CGIL, with the participation of the representatives from ANAEPa CONFARTIGIANATO, CNA COSTRUZIONI, CLAAI, CASARTIGIANI, ANIEM, AGCI, CONF COOPERATIVE, LEGACOOOP as well.

Formedil leads a territorial network of 104 building schools, every year managing over 12,000 courses attended by approximately 160,000 participants including workers, technicians and operators in the construction sector.

Thanks to its presence all over the national territory the construction training system provides training for any local reality and for all the needs, focusing mainly on life-long learning and continuous professional growth of the workers in the construction production process.

Formedil is recognized by the Ministry of Labour as beneficiary of the Law 40/87 concerning training institutes that carry out coordination activities at a national level.

## TRAINING OFFER

The kind of training offered by the Formedil system satisfies the needs for qualification and retraining of construction workers and targets at their professional development in the whole working life by providing continuous support in order to meet market requirements. In addition to refresher training for workers and technicians, fully included in the concept of life-long learning, all building schools carry out courses before entering the worksite, work start-up courses, apprenticeships and safety courses together with additional activities in collaboration with schools and universities. Many schools also organize specialized courses targeted at work phases that require technological knowledge or use of specific machinery, but also addressed to special sectors, with a specific demand, from environment to energy saving, from restoration to cultural heritage and quality management.

FORMEDIL INITIATIVES ARE THE  
RESULT OF POLITICAL TRAINING  
STRATEGIES DEVELOPED BY SOCIAL  
PARTNERS. FORMEDIL WITH CNCE  
(NATIONAL COMMISSION OF  
CONSTRUCTION WORKERS  
FUNDS) AND CNCPT (NATIONAL  
COMMISSION OF LOCAL JOINT  
COMMITTEES) FORM SBC,  
THE BILATERAL SYSTEM  
OF CONSTRUCTION

## FORMEDIL SYSTEM MAIN ACTIVITIES

### Construction Training Data Bank (BDFC)

It is an IT tool by means of which the building schools keep record of the training experiences, trainees' skills as well as of the enterprises' fulfillments. Thanks to the BDFC a Training Record Book is issued certifying the skills acquired by workers after training, and also a RIF, that is the Training Enterprise Register.

The Record Book is foreseen by the National Collective Agreement of work and is based on the Citizen book.

### 16-hour MICS

MICS courses (Integrated Modules to build in Safety) comply with the obligations of the Work Safety Document (Italian law decree 81/2008 arts. 37 and 73). They are certifiable, cover the entire national territory and include three areas: basic training for workers, qualification to the use of machinery, foreman and manager training. The courses are recognized by the Ministry of Labour and the Coordination of Regions.

[www.16oremics.it](http://www.16oremics.it)

### Ediltrophy

National competition of masonry born from the collaboration between Formedil and SAIE under the patronage of INAIL. Young trainees and expert builders selected by the building schools contend for the title of builder of the year after regional selections and a national final that takes place at the SAIE in Bologna.

### Project Future

Innovation in the construction sector and training in SMEs. System initiative targeted at owners and managers of building SMEs for retraining in the various innovation fields.
