

Info-Day Constructy Vet Project

Rome, July 10, 2018

Contract: 2015-1-FR01-KA202-015054

The European-ConstructyVet project seminar was held in Rome at the headquarters of the ANCE and was carried out as a part of the partnership of the European Erasmus Plus Program. This includes training centres, research institutes in 8 countries of the European Community:

Belgium (IFAPME), Germany (BZB), France (CCCA-BTP, project leader), Italy (Formedil), Poland (IBE), Portugal (Cenfic), Spain (FLC and FLC Asturias) and United Kingdom (Warrington Collegiate).

The project, of which the French partner CCCA-BPT is the lead partner, is designed for the "strategic" figure of the site manager and the team leader and the Italian experimentation has seen involved the following Bodies:

In addition to the schools involved in the experimentation of Constructy Vet, other organizations involved in an Italian project called MICSXCAPO took part in the Info Day, always addressed to this *professional figure*.

Rossella Martino, responsible for the project, presented the philosophy of the entire path and thanked everyone for the excellent work done.

The FORMEDIL made available to the schools involved in the experimentations some Technical Consultants who supported the work of the trainers.

The Technical Consultants brought their contribution to the audience and started an interesting debate.

The day ended with an important appointment reminding the ceremony of delivery of certificates of participation to the workers who were involved in the trials.
